Welding for Sport

Are you a motorsport enthusiast? Perhaps you're into Go-Carts, Bikes, Motorcycles, or even airplanes? You may even be a fabricator for a professional

motorsports race team! Whatever it may be you've probably experimented with welding your own vehicle - or you've always wanted to. Chrome-moly tubing is one of the prime ingredients to building a strong, light-weight vehicle - but so is a good TIG weld. You can find out more about TIG welding chrome-moly tubing by reading the "Frequently Asked Questions" article [here](#). But don't forget to also view all the info on Lincoln's new Square Wave TIG 175 PRO for professional performance in TIG welding. [Click here](#) to see this hot new welder.

Aircraft Association
Arlington, Washington
Jul 5 - 9, 2000

EAA AirVenture - Experimental
Aircraft Association
Oshkosh, Wisconsin
Jul 28 - Aug 3, 2000

Power MIG

More and more professionals are making Power MIG 255 their choice for

MIG welding. A combination of Diamond Core Technology and Lincoln quality allow for superior arc welding performance. Plus, the many "extras" set this machine even further apart from others. In addition to superior performance, Lincoln has paid special attention to fine details in quality, features, and appearance creating the Power MIG - The Professional's Choice. [Click here](#) for detailed

Precision Vision

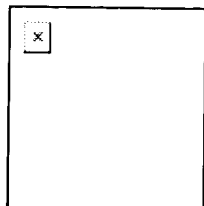

Welding Technology is not always about the arc - it's about the welder too.

No matter how well the arc performs - you can't perform your best unless you have the best possible vision equipment. Lincoln's Ultrashade™ Welding Helmets available in Platinum, Gold, and Silver editions combine the best of technology and user features to make sure that sight is the last thing you have to worry about. Powered by solar cells, automatically

information.

darkened by a sensor bar, manual fine tune adjustment, 4-layer optic block, and great visibility give Ultrashade™ ultra-performance characteristics. **Click here** to view the pdf file. (Requires Adobe Acrobat Reader which can be downloaded from **Adobe**.)

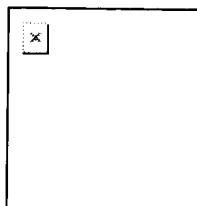

Welding Made Easy

Have you always wanted to weld, but have been intimidated by the

prospect? Do you have small repairs to be made around the home or shop? Do you want to learn the basic techniques that will save you money and begin a life-long passion? Well, you've come to the right place! Lincoln Electric makes it easy when a broken patio chair is resurrected from the dump in just six simple steps. **Click here** for the basics in Welding 101. Be sure to also take a look at Lincoln Electric's equipment & consumables designed especially for the home user **here**.

Did You Know?

Did you know that you can send off an email question to a Lincoln

expert and receive a timely response! Well you can! If you have a question on your specific welding application, a design question, setting up a robotics system, a sales/service question, or just anything at all – you can get it answered here! Once you reach the form simply use the pull-down to select who you want to receive your question and type it into the space below. **click here** for the Contact Us form.
